Ford's 289-cubic-inch V-8 is the second engine in the 90-degree V-8 series of engines, which began with the 221-cubic-inch V-8 in 1962. The 221 was followed by the 260 in 1963. Ford increased the stroke of the 260 to 3 inches to make the 289 in 1964. The other engines in the 90-degree V-8 series are the 302 and 351W.

1966 Mustang Alternator Wiring I recently had a lot of work done on my 1966 Mustang and while the engine was out, I decided to check the alternator and see if I needed a replacement or not. I took it to a local parts store and they ran the tests on my alternator and said that it was bad, so I decided to turn it in and buy a new 65A alternator.
