There are a completely different set of design requirements for a room that isolates sound from the outside environment. (The primary purpose of acoustic room treatments described above is to prevent echoes within the listening room, not to reduce the amount of sound heard outside of the room.)

Home Theater Room Acoustic Design Tips - Carlton Bale .com

In the world of architecture and interiors, the typical situation most designers face on a daily basis involves what is known as electro-acoustics and room acoustics. Electro-acoustics is a specific subset of the field wherein a large percentage of the sound energy is created by electronic transducers (loudspeakers).

Acoustics 101 for architecture + interiors

In last weeks google hangout I was asked which home theater acoustic design software I would recommend? Well in all honesty, I don't use a particular software that's designed specifically for home acoustic design because I'm an engineer. I think in terms of energy and reflections and build-up of low frequencies and stuff like that, speakers are just sound sources to me.

The home theater acoustic design software I would ...
