January 12, 2016 by James Cammarata. After a year of work, we are extremely proud to announce that Ansible 2.0 ("Over the Hills and Far Away") has been released and is now generally available. This is by far one of the most ambitious Ansible releases to date, and it reflects an enormous amount of work by the community, which continues to amaze me. Approximately 300 users have contributed code to what has been known as "v2" for some time, and 500 users have contributed code to modules ...

Since the ansible-2.0 plugin system is more advanced, it is easier to adapt your plugin to provide similar pieces (subclasses, methods) for ansible-1.9.x as ansible-2.0 expects. This way your code will look a lot cleaner. You may find the following tips useful: Check whether the ansible-2.0 class(es) are available and if they are missing (ansible-1.9.x) mimic them with the needed methods (e.g. __init__)
