Application of Value Engineering in Commercial Building

...

Value engineering is a systematic method to improve the "value" of goods or products and services by using an examination of function. Value, as defined, is the ratio of function to cost. Value can therefore be manipulated by either improving the function or reducing the cost. It is a primary tenet of value engineering that basic functions be preserved and not be reduced as a consequence of pursuing value improvements. The term "value management" is sometimes used as a synonym of "value engineer"

Value engineering - Wikipedia

Value Engineering is a search-oriented philosophy which tests products for real value. The three-step problem-solving philosophy of Descartes (intuition, deduction and induction) is offered as ideally suited to problem-solving in Value Engineer
