Arcade is a portable, lightweight, and secure expression language written for use in the ArcGIS platform. Like other expression languages, it can perform mathematical calculations, manipulate text, and evaluate logical statements. It also supports multi-statement expressions, variables, and flow control statements.

Getting Started | ArcGIS for Developers
Guides are straight lines that you can use in layout view to align map elements on the page. Although you can see guides on the virtual page in layout view, they won't show up when you print your map. You can use guides to set margins for a map that isn't the same size as your printer's page size.

ArcGIS Desktop Help 9.3 - Using rulers, guides, and grids
Use ArcMap, ArcCatalog, ArcGlobe, and ArcScene—the traditional ArcGIS Desktop applications—to create maps, perform spatial analysis, manage geographic data, and share your results. Ready to try ArcGIS Pro? The newest addition to the ArcGIS Desktop product line integrates your GIS workflows in a single elegant application.
