Amazon.com: Customer reviews: Bees: A Honeyed History

Honey is a sweet, viscous food substance made by honey bees and some related insects. Bees produce honey from the sugary secretions of plants (floral nectar) or from secretions of other insects (such as honeydew), by regurgitation, enzymatic activity, and water evaporation. Bees store honey in wax structures called honeycombs. The variety of honey produced by honey bees (the genus *Apis*) is the ...

Honey - Wikipedia

The history of the bee | About Bees | Bees | Guide | Omlet US

Early Honey History Honey is as old as history is itself. One of the earliest evidence of honey harvesting is on a rock painting dating back 8000 years, this one found in Valencia, Spain shows a honey seeker robbing a wild bee colony. The bees were subdued with smoke and the tree or rocks opened resulting in destruction of the colony.

The History of Honey - Beekeeping and Bee products

Talking about bees and honey in history must always include Ancient Egypt and Ancient China. But starting from the very beginning of times, we must say that bees are actually one of the oldest forms of animal life, since Neolithic Age, preceding humans on Earth by 10 to 20 million years.
