Nothing needs to be done to suspension unless you want to improve the handling of your E30. BMW M50 engine is slightly heavier than M20 (around 60lbs heavier). Although 60lbs doesn't sound like much you will be able to feel it. Thicker sway bars do wonders on M50 E30s. Wiring and Electrical:

BMW E30 M50 Swap Instructions with Wiring chart

Engine. There are a number of M20 versions out there, ranging from 2.0 to 2.7 litres. However, we expressly recommend the 2.5 litre M20B25 since it produces the most power. All M20 engines are equally thirsty, so there are zero savings to be made by fitting a smaller capacity engine.

Engine Swap - M20 - E30 Zone Wiki

BMW's 2.5-liter M20 is one its most popular engines and is plentiful; being used in the 325i and 525i of the late '80s. In new condition, the engine makes 168 hp and 164 lb-ft of torque at 5800 rpm and 4300 rpm, respectively. With a rather low compression ratio of less than 9 to 1, the motors are robust and only require regular maintenance.

In this video I show how to modify the e36 m52 engine wiring harness to fit e30 chassis. This tutorial also works for m50 engines and wiring harnesses from other cars like e34 or e39.

How to modify m52/m50 wiring harness to fit e30

These numbers are stamped above the main engine number. BMW dropped the CR due to detonation issues on 95RON - no knock sensors back then! To build a 2.7 you have three options: Retain the standard Eta bottom end untouched and fit a head from an E30 320i or 323i. This is the 731 head which has much bigger inlet ports than the 200/Eta.

Building a 2.7 - E30 Zone Wiki

The BMW M20 is a SOHC straight-six petrol engine which was produced from 1977 to 1993. It was introduced eight years after the larger BMW M30 straight-six engine, which remained in production alongside the M20.. The first cars to use the M20 were the E12 5 Series and the E21 3 Series.The initial M20 model had a displacement of 2.0 L (122 cu in), with later versions having displacements of up ...

BMW M20 - Wikipedia

The M20 engine uses full-floating wrist pins, so you can press them into the rod with hand tools. Once the wrist pin is centered on the rod, install the snap rings in the piston. If the clearances for the rotating assembly are within tolerances, coat the bearings with assembly lube and torque the main and rod caps to factory specifications.
