Green building also incorporates proper home ventilation to provide an adequate supply of fresh outside air and monitoring for contaminants, such as radon and carbon monoxide . Besides providing significant environ-

GREEN BUILDING GUIDE

If you are building a lean-to or Quonset, you can reinforce your frame with rebar and PVC or a non toxic variant. Pound rebar into the ground every 4 feet (1.2 m). Leave 48 inches (121.9 cm) protruding from the ground. Once the rebar is set, you can loop 20-foot sections of tubing over the rebar to create your frame.

Building a Backyard Putting Green - YouTube

Green building involves designing and building a home — inside and out — to maximize performance and conserve resources. A green home consumes less energy, water and natural resources; creates less waste; and is healthier and more comfortable for the occupants—all qualities that are easily achieved by using concrete and ICFs.
