GUIDE TO COOLANT ANALYSIS AND COOLING SYSTEM MAINTENANCE
Antifreeze is the hidden hero of our car’s engines. If you don’t know how antifreeze works ,it's pretty simple. Antifreeze is added to the water in your engine’s cooling system that lowers its freezing point (and raises its boiling point too). It’s why the liquid in your radiator doesn’t freeze when everything else seems to be!

These additives work by running through your coolant system and reacting with exposure to air, which in turn forms a seal to block the coolant loss. At Repco we have the radiator additive solutions to ensure you remain on the road and with a store near you we can help get you sorted sooner.

Coolant - Antifreeze | Repco
Manufactured on top of a base of ethylene glycol, this coolant is designed to keep aluminum components well-protected. This OEM product keeps rust and corrosion at bay, and thanks to the use of de-ionized water, scale build-ups on your components are kept to the minimum.
