dynamics are completely different from the McMaster MD program small group approach. In the former, the tutor is a Socratic facilitator of the problem solving processes used by a group of 60 to 100 to "solve the case." In the latter, the tutor is a facilitating presence used as needed by a group of 5 to 9 to "solve the case." All are PBL.

to solve the problem [see Chapter 14 and Kurfiss (1988) for a review]. Of the prerequisites shown in Figure 5-1, knowledge and motivation are the most important. Problem solving can be classified by the type of problem which must be solved. Three different classification schemes are shown in Figure 5-1. A scheme based on the degree of

PROBLEM SOLVING AND CREATIVITY - Purdue University

Problem The number of cars being repaired at a small repair shop has the following PMF:
$$P_N(n) = \left\{ \begin{array}{l} \frac{1}{8} \dots \end{array} \right.$$

Problem Set | Bivariate Normal Distribution | PMF

Additional Homework Problems CDP5-B B. Oxygenating Blood. When arterial blood enters a tissue capillary, it exchanges oxygen and carbon dioxide with its environment, as shown in this diagram. The kinetics of this deoxygenation of hemoglobin in blood was studied with the aid of a tubular reactor by Nakamura and Staub [J. Physiol., 173, 161 (1967)].

Solved Problems - Chapter 5 - University of Michigan

Students will explore the theoretical and practical application of economics to the Canadian economy and business environment. A key element of this approach will be weekly question and answer exercises where students work independently to solve economics problems and then interactively explore answers to weekly discussion questions.
