Cisco Linksys WAP4410n Wireless Access Point Overview

Even then I can't access the configuration via internet explorer. I only noticed this when I had it connected to my switch and it took IP 192.168.0.151, I then tried to connect and it wouldn't. It simply wouldn't take IP if you rebooted it while connected to switch or even straight connect to computer.

Cisco Small Business | Single Point Setup

Just today, on one of the WAP4410N's, I upgraded to the 2.0.6.1 firmware (backing up config, reset to factory default, upgraded firmware, reset factory default again, restored config). After the first reset to factory defaults, the Access Point itself picked up a DHCP address from the server, and I verified
