Comparative research is a research methodology in the social sciences that aims to make comparisons across different countries or cultures. A major problem in comparative research is that the data sets in different countries may define categories differently (for example by using different definitions of poverty) or may not use the same categories.

Comparative research - Wikipedia

This paper analyses the central concerns of selection and execution of cross-national qualitative research. Discussion is issue-driven, incorporating relevant publications on the basis of good practice. An assessment is made of the potential of the qualitative approach in cross-national settings, as well as its pitfalls.
