Troubleshooting Cummins Diesel Engines

Low engine compression will result in insufficient heat being generated to ignite the fuel and cause hard starting. This is more of a problem with older or high mileage vehicles. To find out the compression perform a cold engine compression test. Compression should be between 20 to 35 bars or 300 to 500 PSI.

Diesel: Troubleshooting - Test Calibration

The same goes for changing filters: A dirty fuel filter can impair a conventional vehicle's performance, but dirty fuel can clog a diesel's fuel injection system, and you may need expensive professional help to get back on the road again. As a rule, you shouldn't try to clean or adjust a diesel's fuel injectors yourself, but if you maintain your vehicle according to the directions in the owner's manual, they can last 100,000 miles or more.

Basic Do-It-Yourself Diesel Engine Maintenance - dummies

2 Causes and Troubleshooting for Deficient Power of Diesel Engine CAUSES TROUBLESHOOTING Malfunction of fuel system; Parts obstruction in fuel filter and fuel pipe; Inadequate fuel supplying; Check the fuel switch, they should be opened fully. Clean the fuel filter and fuel pipe.

diesel generator troubleshooting

The 6.2L/6.5L Troubleshooting & Repair Guide was our very first publication, and it has always been popular with diesel owners - and for good reason. This revised and updated 2018 edition is visually stunning while remaining vitally important, and is a "must have" for any 6.2L/6.5L owner.

The 6.2L/6.5L Diesel Troubleshooting & Repair Guide

Smell the fuel tank for any odor of gasoline if the engine tends to run for awhile then die. Drain and flush your tank immediately if you do detect gas. Replace with diesel fuel. Check for any obstructions in the tank that could be blocking the flow of fuel to the engine.

How to Troubleshoot a Tractor Diesel Engine | It Still Runs

Low compression in your diesel engine will prevent heat from being produced to ignite fuel and causes hard starting. This is usually a problem with high mileage or older diesel vehicles. To troubleshoot whether low compression is the problem or not, perform a cold engine compression test. Engine compression should be around 20-35 bars or 300-500 psi.
