You can tell your key cutter software communicates with Mews using the FIAS protocol if, during the setup of your key cutter integration in Commander, you entered { "Type": "FiasProtocol" } into the Data JSON field. Alternatively, you can find a list of our currently supported FIAS key cutters here.

**Set up Connector - Mews Help**  
As mentioned before, the protocol of the Fidelio system is based on spontaneous messages, that is, only changes of states are sent through the protocol whenever they occur. When IntesisBox starts up, a message is sent to the panel to force a response of current state of all elements to update IntesisBox BACnet registers with the correct value.
