Gestalt principles: proximity, similarity, closure, continuity, and Prägnanz (figure-ground). For visual marketers, this is great news. Because as wonderful as the human mind is, it doesn't reliably use logic when it comes to visual perception. Optical illusions are just one example of this.

### What Visual Marketers Should Know About Gestalt Principles

The classic principles of the gestalt theory of visual perception include similarity, continuation, closure, proximity, figure/ground, and symmetry & order (also known as prägnanz). Others, such as "common fate," have been added in recent years. Why is gestalt theory important?
