If they are still growing well then tidy the plants up and allow them to recover for next year. The propagated runners can be planted into fresh ground whenever they have filled out their plastic pots with roots. Or leave them in the greenhouse over winter to grow on a bit more, then plant out early next spring.

Alternately, clear an area of your garden for growing microgreens. Scatter seeds over the surface of the soil evenly. You will spread more seeds than you would if just planting the seeds to grow to full size, since they will only get 1-2 inches tall and you want to harvest as many as possible from each tray.
