Ketamine is a medication mainly used for starting and maintaining anesthesia. It induces a trance-like state while providing pain relief, sedation, and memory loss. Other uses include sedation in intensive care and treatment of pain and depression. Heart function, breathing, and airway reflexes generally remain functional. Effects typically begin within five minutes when given by injection ...

Ketamine - Wikipedia
In 1802, the British began the Great Trigonometric Survey of India to fix the locations, heights, and names of the world's highest mountains. Starting in southern India, the survey teams moved northward using giant theodolites, each weighing 500 kg (1,100 lb) and requiring 12 men to carry, to measure heights as accurately as possible.They reached the Himalayan foothills by the 1830s, but Nepal ...

APA is an in-text citation style. This means you insert a brief reference ('citation') into your writing whenever you use a source. The citation should appear within the body of the document and includes details such as the author's family name, year of publication (in round brackets), and page numbers (if applicable).
