Investopedia

Day trading works by capitalizing on short-term price movements in a stock through the active buying and selling of shares. Day traders seek volatility in the market. Without short term price movement (volatility) there is no opportunity. The more a stock moves, the more profit a trader can make or lose in a single trade.

Day Trading Guide For Beginners

[2020]

By the strictest definition, a day trade is a position that is entered and exited in a single day. Day trading refers to market positions that are held for only a short time. Typically, the trader opens and closes a position the same day but positions can be held for a longer period of time as well.

Day Trading, like all trading, used to take place on the trading room floor. It was exactly what you'd think it was. There was a lot of yelling and phone's were ringing and there was a lot of money to be made when a price began to rise or fall. Information traveled very slowly. When the stock market went digital, most of
