New European standards for lifts EN 81-20 :: W+W

New List of Standards for the CE Marking of Lifts. There is a new list of European harmonized standards available for the CE marking of lifts. The European Commission published the list earlier today. The standards on this list may be used in the conformity assessment of lifts. Compliance with all relevant standards leads to a presumption of conformity that the lift fulfils the essential requirements of the European Parliament and Council Directive 95/16/EC on the approximation of the laws ...

New List of Standards for the CE Marking of Lifts

Almost 2 years ago, new European standards for the design, manufacture and testing of lifts were introduced. The standards apply to both passenger lifts and passenger goods lifts and come with the catchy names of EN81-20 and EN81-50. The introduction commenced with a three year transition period which ultimately will see the previous standards EN 81-1 and EN 81-2 phased out completely, by 31st of August 2017.

New European Standards - EN 81-1 EN 81-2 - Commercial Lifts

The lifts Directive 2014/33/EU permits the free circulation of lifts and safety components for lifts within the internal EU market and ensures a high level of safety for lift users and maintenance staff. This harmonised EU legislation governs the design, manufacture, and installation of lifts. It is mainly relevant for lift installers and components manufacturers but also has important implications for the owners and users of lifts.
