Nurses Attitudes Towards Continuing Formal

The education of nurses has an influence on patient safety and outcomes, the nursing shortage, the faculty shortage, and nurses' attitudes and actions. This article reports on a dissertation study designed to examine the attitudes of nurses, initially registered with an associate degree or diploma in nursing, toward continuing formal education. Actively licensed registered nurses in the eastern and western United States (n = 535) participated. The main finding of this study was that, although ...
