The syntax for the DROP USER statement in Oracle/PLSQL is: DROP USER user_name [CASCADE]; Parameters or Arguments user_name The name of the user to remove from the Oracle database. CASCADE Optional. If user_name owns any objects (ie: tables or views in its schema), you must specify CASCADE to drop all of these objects.

Oracle / PLSQL: DROP USER statement - techonthenet.com

Example. Let's look at an example of how to change a password for a user in Oracle/PLSQL. For example: ALTER USER smithj IDENTIFIED BY autumn; This example would change the password for the user named smithj and set the new password to autumn.

Oracle / PLSQL: Change a user's password in Oracle

In Oracle Database 11g, the PL/SQL compiler has the ability to identify which calls to which subroutine should be copied (or inlined) and makes the changes, resulting in better performance. This is best explained with an example. The code below updates a table called BALANCES with the calculated interest from the account balance.

Updating LOB from pl/sql results in ORA-07445 ...

Hi Tom - We recently upgraded a database from 10g to 11g. When we did the upgrade, we brought over 3 months worth of data from the old database and started using the new database. When we initially started, the size of the database was 40gb. But since then, the database has continued to grow at a rate of 10gb per day and it is at 600gb now.
