What is a high-level design document? A high-level design document (HLDD) describes the architecture used in the development of a particular software product. It usually includes a diagram that depicts the envisioned structure of the software system. Since this is a high-level document, non-technical language is often used. What is in a ...

How to Write Software Design Documents: With Examples | Toptal

The use cases are also the basis for designing the logical architecture in the design phase. The logical architecture and the system requirements together form the deployment scenario, which later is an input to the deployment design phase.. The following figure shows the technical requirements phase in relation to the business analysis, logical design, and deployment design phases.
