Virtual Lab: Population Biology. How to get there: (biol.co/paramec1) Alternately: type virtual lab population biology into google to find the page. Instructions: This lab has instructions on the left hand side and also contains pages to enter data and questions. Due to the trouble we've had in the past with submitting documents and data this way, it is preferable to just turn in a handwritten or typed copy.

Virtual Lab: Population Biology

Dynamic Change Like the individual organism, the population is a real and functional unit in biology. Defined as groups of organisms that are genetically and spatially distinct from other such groups, the population is the fundamental unit of evolution. Populations are dynamic, they grow, decline, colonize new populations, and go extinct.

Population Biology Virtual Lab Answers

Virtual Lab: Population Biology. Shannan Muskopf June 5, 2016. This lab uses the glenco simulator, Virtual Lab: Population Biology to collect data on two populations of paramecium, P. caudatum and P. aurelia. Though the simulator doesn't expressly say it, the activity illustrates the competitive exclusion principle by showing students how each population behaves when grown alone or when mixed together.
