Principles And Practice Of Mechanical Ventilation ...

because airway pressure = flow x resistance + (alveolar pressure) + PEEP, when resistance approaches zero, airway pressure = alveolar pressure + PEEP. Thus in a normal person, the PEEP goes straight to the alveoli. PEEP. This document was created by Alex Yartsev (dr.alex.yartsev@gmail.com); if I have used your data or images and forgot to reference you, please email me.

Basic Physics of Mechanical Ventilation

A mechanical ventilator is an automatic machine designed to provide all or part of the work the body must do to move gas into and out of the lungs. The act of moving air into and out of the lungs is called breathing, or, more formally, ventilation.
