Spatial design is a relatively new conceptual design discipline that crosses the boundaries of traditional design specialisms such as architecture, landscape architecture, landscape design, interior design and service design as well as certain areas of public art.

### **Spatial design - Wikipedia**

Space is a design consideration that recognizes the importance of empty places in a design. In the context of architecture, space is a physical environment in which people live and work. In the case of visual 2D design, space is a way to create a sense of separation between elements that makes a design more visually appealing and usable.
