Tubes will vary in diameter depending on the style of needle handle and method of retaining the needle in the tube. Economy needles will use a colour-coded plastic retainer to compress the handle of the needle against the inside wall of the tube. When these are removed the needle drops down to the surface of the skin and is ready to be inserted.

Acupuncture is an ancient method in traditional Chinese medicine (TCM). Usually acupuncture needles are inserted into the body to achieve therapeutic effects. However, there are still some challenges to achieve consensus. What is the essence or anatomy of acupuncture meridians? How does acupuncture work? How to improve acupuncture clinical therapeutic effect?
