And chapter 3 is a joke: its title "statistical tools for health economics" promises an explanation of econometric statistics but instead delivers a shallow introduction to basic statistical concepts. If you have taken statistics before, you will find the chapter poor. I wonder how I would have found the rest, had I taken economics before.

The economics of healthcare 3  
Healthcare is not the only good or service in the economy that departs from the standard model of supply, demand, and the invisible hand. (Recall our discussions of externalities and monopoly.) But healthcare may be the most important good or service that departs so radically from this benchmark.

Overview. The strong links between socioeconomic factors or policies and health were documented in the World Health Organization (WHO) Commission on Social Determinants of Health report. Yet even when health and health equity are seen as important markers of development, expressing the benefits of social determinants of health interventions in health and health equity terms alone is not always sufficiently persuasive in policy settings where health is not a priority, or when trade-offs exist ...
