Lighting Effects Props - Animated Props - Props

A downward curve of the lip of the blade (like a plane's wing with the "flaps" down) allows a better hole shot, less slippage and ventilation, and helps the propeller get a better bite on the water. A cupped prop may allow the engine to be trimmed with the prop closer to the surface, and will also decrease rpm by 150 to 300.

Selecting a Propeller | West Marine

I started a survey a few weeks back to gather some information for my upcoming book, The Prop Effects Guidebook. While most of the answers were only relevant to me, I thought I would share the results of one of the questions. Responses to survey. Ninety-eight people answered the above question, which is a good chunk of props people.
