Univeristy Of Ga Pesticide Training

The Georgia Department of Agriculture (GDA) and the University of Georgia's Pesticide Safety Education Program (PSEP) have jointly developed the Georgia Competent Applicators of Pesticides Program (GCAPP) to provide Georgians who might wish training in the proper and safe use of pesticides. This training program is now available online on the Georgia Professional Certifications website.

Pesticide Safety Education - University of Georgia

Georgia's Pesticide Safety Education Program promotes the responsible and safe use of pesticides throughout Georgia. We accomplish this by providing the educational resources, training programs, and materials needed to help both private and commercial pesticide applicators achieve certification and subsequently to maintain the knowledge to safely and effectively make use of restricted-use and all other pesticides.

Pesticide Education - University of Georgia

Under the new label, only certified applicators who have a pesticide license and have completed this training will be able to load, mix, and/or apply paraquat. No longer will persons under the direct supervision of a certified applicator be able to use the product. The training will have to be completed once every 3 years.

Paraquat Dichloride Training for Certified Applicators ...

The Georgia Pest Management Handbook gives current information on selection, application, and safe use of pest control chemicals. Recommendations are based on information on the manufacturer's label and on performance data from research and extension trials at the University of Georgia and sister institutions in surrounding states.
