Here are two tire size charts that list every tire by wheel size or by diameter to make your search as simple as possible. Each metric tire measurement shows both the metric tire size and the inch equivalent. To calculate a metric tire size into inches you multiply the first number by the second number divided by 100 which gives you the sidewall height in millimeters, divide it by 25.4 to convert it to inches.

### Tire Size Chart

The true diameter of a wheel measured tire-edge to tire-edge will differ quite a bit depending on the rim width, the tire pressure, and plenty of other factors. This inaccuracy is especially true of 27.5" wheels because the name 27.5" doesn't derive from the diameter of the wheel at all.
